BUDDLEIA, "FORTUNE"

Plant Patent No. 206

Most everyone is familiar with the Butterfly bush. Several varieties of it have been offered for a number of years. All of them had defects and many shortcomings. In Buddleia Fortune we believe we come very close to perfection. The bush or shrub is of very neat habit, about four feet high and four feet across. It possesses none of the undesirable wild and rough growing characteristics of the older varieties. The foliage of Buddleia Fortune is a deep, leathery dark green. The color is pure lilac with a brilliant orange eye in each tiny flower, thousands of which make up the sprays which are from 12 to 18 inches long. The flowers are produced in super-abundance throughout the entire summer and autumn until stopped by frost. The flower sprays instead of being flat on one side as in the old varieties are fully round and in bloom from base to tip practically at the same time. The blooms of the older varieties are faded and brown at the bottom of the spray before the tips are in bloom. To see one of these plants in bloom is a sight worth while. The flowers may be cut with stems 2 to 3 feet long, and last in water for several days, which is not possible with other kinds. All of the old kinds wilt very quickly. Buddleia Fortune is a grand cut flower as well as a fine plant for the flower garden. Strong plants that will bloom this summer.

The New Ideal Darwin Tulips

What Nationally Known Authorities Say

Richardson Wright (House & Garden) writes:

For several years now the "Ideal Darwin" Tulips have made a most gallant and brilliant display in my garden. They possess sturdy substance that leaves nothing to be desired. Their color range is so generous that both in massed plantings and in shoals through the herbaceous border all manner of subtle and striking combinations can be made. They are a garden investment that pays high premiums of beauty.

The late Leonard Barron wrote:

Further study of and experiment with the Ideal Darwin Tulips merely adds weight to the conviction already expressed; that they do form a really ideal group in that splendid family of bulbs. Their bright colors, their cheerful bearing and, yes, their real gayety in the garden, make them delightfully welcome.

The Ideal Darwins have, indeed, made my garden much more joyous in Tulip time.

IDEAL DARWIN TULIP MIXTURE

This mixture contains a marvelous selection of new Ideal Darwins. It stands to reason that it is impossible to introduce all the new creations that are being produced by the originator. Therefore, many magnificent seedlings must be destroyed in order not to bring out too great a selection of varieties, many of which are often much alike. It is those unnamed but truly choice seedlings, as well as many of the named varieties that compose the selections we are offering here.

Here is the richest of violet-blue Tulips, Bacchus, with a dusky bloom on its outer petals like that found on grapes. The flower is held very straight at the top of a 2½-foot stem; the beautiful tone of purple makes it especially nice to use with sky-blue spring flowers, and the suggestion of *Anchusa myosotidiflora* is given here as a companion or foreground for this variety. We suggest a liberal planting for cut flowers.

adequate description; let that, however, not deter you from planting a few of these remarkable new Tulips. The richness of tone as well as sheer stately dignity will eventually open all garden gates for them.

Multi-flowered Tulips

Bunch-flowering or Multi-flowered Tulips are a most interesting lot. Instead of producing the conventional single stem with one bloom on top, the varieties offered under this heading all grow a strong main stem with from 3 to 6 branches, half way up the stem, each side shoot or branch carrying its own flower. The result is that 3 to 6 or sometimes 8 flowers are obtained from one bulb. All the blooms are of good size, are gracefully spaced and as you can well imagine, produce an unusual effect and a great mass of color. The soil must be kept rich because if planted in poor ground they will not be as floriferous.

All the varieties offered are most attractive, some very unusual in their coloring.

Bizarre and Bybloem Tulips

(Old Dutch Tulips)

Bybloem and Bizarre Tulips are "rectified" Breeder types. The Tulips are of an old race which has been grown in Holland and in France since the beginning of the seventeenth century, and which caused the famous Tulip craze in 1635. The Bybloems are queerly striped and feathered rose or violet on a white ground. The Bizarres have dark brown stripes and feathering on a yellow ground. They flower about the same time as the Breeder and Darwin Tulips but do not grow quite so tall, and are seen at best advantage when planted in clumps in the herbaceous border or among evergreens and shrubs. They are above all sensational show Tulips. All form rare artistic beauty.

- *Bizarre and Bybloem Tulips Mixed** Doz. \$0.65, 100 \$4.50, 1000 \$40.00

Cottage and Hybrid Tulips

(May-Flowering Tulips)

The Cottage Tulips come into bloom in early May. They are hardy and robust, with long, slender, but very stiff stems. The flowers are mostly long and oval, many of them with the petals gracefully reflexed. The Cottage Tulips as a class are rich in the

more delicate and artistic shades of pink, yellow, orange, and fawn with salmon, old rose, and amber. They are best of all Tulips for cutting and should be planted outdoors. They will last for many years.

- Adriani** Doz. \$0.75, 100 \$5.50
Clear primrose-yellow; inside canary-yellow; yellow base and stamens. One of the loveliest Tulips. 24 inches.

A charming two-tone Tulip. Large and freely opened cup with broad petals slightly reflexing, of unusual grace and beauty. The artistically formed flower is of a translucent, light chrome-yellow. There is, we believe, no color just like it, contrasting perfectly with the green of its leaf, adding to its other charms an exquisite springlike fragrance. Massed over brown Pansies or rising out of drifts of Forget-me-nots, they create an unforgettable picture. Fine for cutting. A most important acquisition. Height 25 inches.

Undoubtedly destined for a great future. Height 36 inches.

The color is delicate with lovely flushes, that one has difficulty giving a description of its charms. It is sweetly fragrant. Height 25 inches.
- *Carrara** Doz. \$0.65, 100 \$4.50, 1000 \$40.00
This Tulip has created, by its beauty, a sensation at the great flower shows. It is round and beautifully molded and as purely white as the marble from which it takes its name. It is in all ways an enchanting Tulip. Now available at a most reasonable price. Height 29 inches.

Not overly tall, yet it carries itself nicely on a stem of 27 inches. An engaging combination with Phlox divaricata or a pale yellow Iris. Rosabella is best not grown near any other Tulip. Chinese Lantern Tulips

Imagine a handful of Tulips having the delicate pure pastel shades of our finest Sweet Peas and you have but a fair description of their colors. The general effect, however, is that of lighted, delicately colored Chinese Lanterns. The perfectly formed globular blossoms glow with an iridescent light not heretofore seen in Tulips. The colors are too exquisite to accurately describe. They have been admired by visiting growers from all over Europe.

The colors are all in those elusive tints of salmon, orange and salmon-pink of the most delicate pastel shades, yet brilliant and vibrant with life.

Three Oldest Tulips

Gala Beauty Doz. \$0.80, 100 \$6.00
Early 1600. Golden yellow with carmine-red, flaming pointed flowers carried on 23-inch stems. The unusual coloring blends with white Tulips.

Zoomerschoon Doz. \$3.25, 100 \$22.50
Early 1600. Delightfully attractive and dainty Tulip still considered to be one of the finest. The blooms are salmon-rose, flaked creamy white. Height 22 inches.

Green Knight Doz. \$0.75, 100 \$5.50
Early 1700. Most unusual blending of pale yellow and apple-green. The flowers are pointed and graceful, blending beautifully with yellow or pink Tulips. Height 22 inches.

Chameleon Tulips

Here we have a collection of new Tulips which in form and shape resemble the Darwin Tulips; the coloring, however, reminds one of the Cottage Tulip Picotee.

When Chameleon Tulips first come into bloom they show only faint tracings or delicate margins of pink on the edges of the flower petals, with the development and consequent aging of the bloom these markings enlarge and gradually spread over the entire flower. The blossoms never look the same from day to day and it is truly fascinating to watch this change of color taking place.

Opening creamy white delicately flushed rose, when fully developed the flower is a clear rose shade. This is an exceptionally beautiful variety when used for forcing in pans in early February. One of our favorites. Height 26 inches.

Opening white and rose, becoming a lovely rosy red when in full bloom. This variety has been greatly commended by all who have seen it. Large flower of good substance, which is carried on a strong stem. Height 23 inches.

Wayside's Wonder Doz. \$0.80, 100 \$6.25
Opening pure white with a delicate deep red picotee edge. This narrow band of color spreads and becomes more beautiful as the flower ages, softening in tone until the entire flower has turned to rose-pink. Then as well as at opening it is a delightfully lovely Tulip. Height 24 inches.

***Chameleon Tulips in Mixture of the Above Varieties** as well as many others not yet offered. Doz. \$0.75, 100 \$5.50

Lily-Flowering Tulips

The Tulips offered under this heading have been kept by themselves because of their distinct lily-like flowers. They really belong with the Cottage Tulips but would be lost or difficult to find if offered in that already quite large group.

Lily-Flowered Tulips bloom the same time as the Cottage Tulips and are best used where a light, airy and graceful effect is desired. The delicately curved petals give a delightful effect. As a flower for cutting, it surpasses the regular Tulip because they are so much more graceful. Don't miss planting a few this year. The most complete list in existence is offered here.

Rembrandt Tulips

Rembrandt Tulips are nothing more or less than Darwin Tulips in which white, lavender, red and other colored stripes or flakes have appeared. The blending of colors is at all times in perfect harmony and most attractive and colorful. They are especially fine when used for cut flowers. They bloom at the same time as the Darwins and require the same care. We advise their use in mixture only.

The old varieties are not recommended, but you will like to have some of these new quaintly shaped flowers, particularly for house decoration or for clumps here and there in the border or where you have strong groups of evergreens. Their artistic form and coloring make them especially suitable for cut-flower purposes. Fantasy is recommended for pot culture also. Forced slowly in not too high a temperature it develops into one of the most unusually handsome pot plants ever seen.

Single Early Tulips

Few, if any, of the spring-blooming flowers rival the Single Early Tulips for brilliancy of bloom or ease of culture. They are excellent subjects for formal beds on the lawn or for garden borders. While they do not possess the same size of bloom and length of stem as the May-Flowering Darwin, Breeder and Cottage varieties, they are used where earlier blooms are desired. Many of the varieties may be forced in bloom in January, while all

Botanical Tulips and Species

Tulip species, coming as they do from southern Europe and Asia, should be planted in dry, sun-baked locations. No water should reach the bulbs during the summer.

The following collection of Tulip Species or Botanical Tulips includes a great number of beautiful and interesting varieties, which show a bewildering variation in size and shape of flowers, structure of the leaves, habits, etc., and they only have in common that they grow wild in some parts of the world, Asia Minor, Central Asia, Greece, the Mediterranean, etc. Cultivation has not modified them and they may be planted in the rock garden between creeping plants or in colonies in small, warm nooks, a situation where the larger flowered Garden Tulips would be out of place. (Varieties offered by the dozen will be gladly supplied in quantities of three).

- Acuminata (Cornuta stenopetala)** Doz. \$1.10, 100 \$8.00
The long, very narrow tapering petals end almost in a threadlike point. One of the most unusual and distinct species. The long flower is yellow streaked with orange-red. Height 15 inches.

By a special cultural treatment in Holland, Hyacinth bulbs can be grown which will produce from 6 to 10 excellent flowers on one bulb. We have secured about 7000 bulbs of these Hyacinths. A thousand more or less of each color. If you would like to grow bulbs in the house, here is an opportunity you must not overlook. They are easily grown in Wayside Gardens Bulb Fiber or earth. Her Grace

Doz. \$0.95, 100 \$7.00

A beautiful overlapping snow-white perianth with a large cool ivory crown resting firmly against it. Its prominent characteristic is the exquisite curving of the crown's edge. The delicate related tints of cream color and ivory which play in the texture of the lacy ruffles of the brim are most unusual. A strong grower, making large broad foliage. The flower has much substance and the entire plant is of exhibition quality.

*Lord Kitchener

Doz. \$0.75, 100 \$5.50

Broad, flat, pure white perianth, very pale primrose crown. A fine variety and great improvement over Mrs. Langtry.

Cyclamineus Hybrids

Particularly Recommended in This Class is February Gold

Smaller than February Gold and more adapted for rock garden planting.

Jonquilla Hybrids

Particularly Recommended in This Class is Orange Queen

Division 7: Hybrid Jonquils with two or more, small, very fragrant flowers on one stem.

- ***Campernelle, Single** Doz. \$0.70, 100 \$5.00
A tiny golden Daffodil with tips of pointed grasslike foliage reaching above the flowers; the broad overlapping petals make a nicely rounded perianth; frequently three blooms on a stalk; a delightful little flower.
- Campernelle, Double** Doz. \$0.70, 100 \$5.25
Two to three golden yellow, small, fragrant flowers on strong stems; lovely for cutting. Height 13 inches.
- ***Golden Scepter** Doz. \$0.70, 100 \$5.25
A medium sized perfectly built flower of deep Jonquil-yellow, 3 inches or more in diameter. The whole flower, as with the others in this class, is of the greatest substance, keeping in perfect condition exceptionally long both in the garden and when cut.
- Lady Hillingdon** Doz. \$4.50, 100 \$32.50
A fine companion for Golden Scepter, blooming earlier; cluster-flowering type, but well worth growing even if all the flowers came singly; perianth a clear butter-yellow, with broad outer petals opening flat like those of a Trillium, with the narrow inner petals curving forward around the moderate-sized shapely trumpet of deep Jonquil yellow.
- Odorus, Orange Queen** Doz. \$1.00, 100 \$7.50
A very striking variety, 2 to 3 flowers on a stem, color intense golden orange, cup prettily fluted. Delightful Jonquil fragrance. The flowers are produced in the greatest profusion on wiry stems about level with the tops of the strong but not coarse foliage; truly a Daffodil for every garden and the gayest of the lot, large or small.
- ***Tullus Hostilius** Doz. \$1.05, 100 \$7.75
Of the Jonquil-yellow trumpet type; strong growing flower of remarkable substance, lasting exceptionally long in the garden or when cut; an ideal Daffodil for informal use and for the large rock garden.
- White Wedgewood** Doz. \$4.50, 100 \$32.50
A dainty and charming flower borne on a tall stem; starry perianth of cream-white, with a trumpet of a pale primrose; beautiful for cutting and effective in front of the Daffodil border, among other varieties.

Triandrus Hybrids

Particularly Recommended in This Class is Moonshine

Division 5: These are the cyclamen-flowered Daffodils with reflexing perianth. The flowers are more or less drooping, of elegant form and graceful habit.

- ***Agnes Harvey** Doz. \$2.05, 100 \$13.50
A most dainty Daffodil of drooping habit, 1 to 3 flowers on a stem; white starry perianth with Triandrus type trumpet, of the same color, sometimes flushed faint apricot. A wonderful flower for naturalizing, especially near water, and also for cutting; desirable in every way.
- Moonshine** Doz. \$1.75, 100 \$12.00
A beautiful Triandrus hybrid, star-shaped white flowers, often three to a stem, drooping gracefully, very beautiful and a great favorite, especially for the rock garden or for naturalizing in the shade. A fine exhibition variety.

A wild hybrid discovered in Spain. One of the most beautiful, distinct, and graceful Daffodils and recommended either for pots and bowls or for naturalizing in woodlands, rock gardens, etc. The flowers vary slightly in size, and sometimes in form of trumpet, but all are of a soft, delicate canary-yellow, with a graceful reflexing perianth. Height 12 inches.
- Shot Silk** Doz. \$3.25, 100 \$22.50
A charming Triandrus Hybrid, three flowers to a stem. Perianth and cup uniform creamy white, slightly star-shaped, long narrow cup. This is undoubtedly the most graceful little Daffodil in this class and will appeal to all lovers of the smaller types.
- ***Thalia** Doz. \$1.75, 100 \$12.00
In addition to a peculiar attraction at first sight, this flower leaves one with an impression that it is white, yet it is a whiteness that is not white. The recurving petals and the angle of the three trumpets are unlike the conventional short-cupped Daffodil. The stem is dark green, round and reedlike thin. Some call it the "orchid-flowered" Narcissus which adds to the mystery. Thalia provides unusually good material for artistic arrangement.

Double Narcissi

Particularly Recommended in This Class is The Pearl

Division 10:

- ***Albus Plenus Odoratus** Doz. \$0.65, 100 \$4.50
The old Gardenia-flowered Double Poet's Narcissus. Pure snowy white; wonderfully fragrant. It is a rare old variety preserved jealously in a few old gardens and worth special care.

The outer petals are yellow and the center ones are bright orange. A very full, most attractive flower.

Nice flower; not too double, creamy white, interspersed with sulphur-yellow, deeper at the center; charming.
- ***Twink** Doz. \$1.55, 100 \$11.00
It is double, of the semi-full type, the petals alternating a soft primrose and clear orange, and so arranged as to give the flower a most attractive appearance, and making it a most adaptable flower for large scale decorative work; is very free flowering and hardy.

Poetaz Narcissi

Particularly Recommended in This Class is Frans Hals

Division 8: All Poetaz are hybrids from Poeticus Ornatus and Polyanthus Narcissi. The plants are tall and vigorous growers, bearing heads of large, well-formed flowers, deliciously fragrant. There is no better group for indoor culture in flats, pots or bowls, while if planted in time, their hardiness outdoors leaves nothing to be desired.

- Admiration** Doz. \$1.25, 100 \$9.00
This beautiful cluster-flowered Daffodil is especially lovely in full sunlight, as it has a transparent character, but the flowers viewed in shade do not look poor or papery. The perianth, which is a sulphur-yellow, seems rather to be of the quality of the soft taffeta silk which, in the old days, was known as "sarsenet," and the petals are slightly ridged lengthwise. The corona is of rich orange-scarlet and there are usually about 6 flowers to a stalk.
- Cheerfulness** Doz. \$0.70, 100 \$5.00
The double Elvira, a very pleasing double white Poetaz, good stems, a fine garden and show flower.
- Elvira** Doz. \$0.60, 100 \$4.25

Tall, flower delightfully informal in habit, perianth Poeticus white with eye orange, edged red; good for semi-shade; very early and an excellent forcer.

One of the finest of the yellow Poetaz. Perianth is of rich yellow with a slightly darker cup.
- ***Laurens Koster** Doz. \$0.75, 100 \$5.75
Creamy white perianth, lemon-yellow cup, free flowering.
- Orange Cup** Doz. \$0.95, 100 \$7.00
Creamy white, conspicuous orange cup, a most delightful color combination of plastic rubies floating on sulphur pools, 6 to 8 florets and usually two stems per bulb. Keeps its color in bright sunlight positions.
- Scarlet Gem** Doz. \$2.35, 100 \$16.50
Here is a very artistic contrast in color. The attractive, finely formed flower has a perianth of primrose-yellow with a deep orange cup. A most interesting Poetaz.

Golden Yellow Narcissi

(Soleil d'Or)

Soleil d'Or resembles the Paper-White Narcissus very much in habit but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We have some very fine stock of this variety to meet the steadily increased demand of the past few seasons and recommend its use in place of the Chinese Sacred Lily. Do not omit a few bulbs from your order.

Daffodils for Naturalizing

The greatest and most effective use of Daffodils is to naturalize them in quantity in meadows and orchards, in woodlands, and along the driveway, on the bank of the brook or along shrubbery.

By planting some bulbs on the south side and some others facing north, a long period of flowering, lasting well over a month, may be enjoyed.

Daffodils are the most prolific of flowers. If you plant a single bulb it will not be long in gathering a family, and in the course of two or three years the spot in which it grows will have become as populous as the tents of the patriarchs.

Planting mixed Daffodils is an investment that pays large dividends, **if the right varieties are used.**

The mixture presented by us is made up from named varieties and should, therefore, not be confused with other mixtures offered. This mixture is not grown as such, but varieties are selected that are especially adapted for naturalizing and will give an abundant and prolonged flowering period, increasing rapidly.

- ***Mixed Daffodils, Standard Varieties**
100 \$4.25, 1000 \$35.00, 10,000 \$300.00
10,000 bulbs or more, special prices on request.
- ***Mixed Daffodils, New and Standard Kinds**
100 \$5.25, 1000 \$45.00, 10,000 \$400.00
Containing standard varieties as well as novelties.

Named Daffodils for Naturalizing in Drifts

Some people prefer to naturalize Daffodils in drifts; planting a certain number of bulbs of one variety in a clump. Here we see in the immediate foreground *Emperor* followed by *Helios* which in turn is followed by *Barri Conspicuum*, next to which is planted *Poeticus Recurvus* which is still in bud, and so on. We offer here 10 kinds particularly suited for such treatment.

Lilium Candidum

(Madonna Lily)

The Madonna Lily is one of the loveliest of white Lilies, popular throughout the world, loved and admired by all. Its delightful fragrance and lovely white flowers have made it a universal symbol of purity. Plant it in groups of three or more bulbs, close to the pale blue Delphinium Belladonna. It will be the loveliest spot in your garden during late June and early July. Madonna Lilies are simple to grow if you will plant in full sun and perfectly drained soil. Most Madonna Lilies are grown in France. Bulbs from the north of France are better than those grown in Southern France. We offer, therefore, Northern France grown bulbs as follows:

Lilium Regale

(The Regal Lily)

One of the most beautiful and one of the hardiest Lilies in cultivation—"Lilium Regale" is truly a Royal Lily, worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with fine foliage. Center of flower flushed with yellow shading to white at outer edges; externally the flowers are streaked with brown on the "ribs," shaded through the almost translucent petals with a delightful pearly tint; the contrast between the color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. The Regal Lily is very floriferous and when thoroughly established, bears as high as 18 to 20 flowers during the season. Fall-planted bulbs should be protected against freezing.

Lilium Testaceum

Also known as "Excelsum" and as the "Nankeen Lily." One of the choicest garden Lilies. The warm apricot tone, almost a cafe au lait, set off by brilliant orange anthers, puts it in a color class by itself; in fact, many people consider it the most graceful and lovely of all Lilies. It is beautiful for every kind of garden use but because of its tender coloring, must be planted in a mixed border with brighter flowers. In combination with light-shaded Delphiniums or with the Madonna Lily, which it resembles, it is most effective. It has the texture of Lilium Candidum, with reflexed petals and does well under the same conditions as Candidum. Four to five feet high, June-July flowering.

Top size bulbs.	Each \$0.70, Doz. \$7.00
Fine first size bulbs.	Each \$0.65, Doz. \$6.50

Lilium Philippinense Formosanum

Not unlike the Regal Lily in general appearance. The slender stem is covered with the same grassy foliage as the Regal Lily. The substantial blooms are trumpet-like; in fact, they are long, lovely white flowers, with a beautiful pale emerald-green throat which gives the flower a distinct and delicate appearance. They commence blooming in early August and flower until stopped by frost. Bulbs when established will produce 3 to 4 spikes each with 4 or 5 blooms. It is a most liberal flowering Lily, to all of which may be added that they are among the easiest grown. September flowering.

Doz. \$2.00, 100 \$15.00

Sunset Lily

Lilium Pardalinum Giganteum

Vigorous, hardy, of easiest culture, and dependable. Much more cannot be said. Under ideal conditions the stalks attain 7 feet, clothed with luxurious foliage and bearing a dozen or more beautiful flowers in July. The petals are somewhat recurving, and a brilliant sunset-red, base of flower yellow heavily spotted with small brown dots. The "Sunset Lily" is one of the most satisfactory ever grown.

Lilies for Indoor Growing

The short time required to bring these peerless Lilies into flower render them invaluable. The flowers are delightfully fragrant, pure waxy white, and if cut when partially open can be kept for two weeks. Bulbs potted in September can be had in flower in December, if desired. A succession of bloom can be kept up throughout the winter by bringing in a few pots of bulbs from cold frames at intervals. Blooming plants in pots are suitable for Easter offerings and presents. Bulbs ready for shipment—August to December.

General List of Hardy Lilies

Lilies, unlike Tulip bulbs, are not all grown in one locality under one and the same conditions, but are gathered together from many foreign countries. All ripen off at different times of the year; therefore, orders for Lilies can not always be filled at one time. The requirements of Lilies vary with each variety. We have a booklet on their culture, which will be sent to you upon receipt of 25 cents.

Because of the lack of knowledge and the carelessness of many planters, we do not guarantee Lilies to grow. We do, however, guarantee to supply you bulbs in good condition and will replace without charge, any damaged bulbs, immediately upon hearing from you.

Amaryllis Hippeastrum

Camassia Leichtlini

Allium Neapolitanum

Calochortus

Until one has seen a good collection of these plants, he has no idea how much Nature can do in the variation of one flower. All Mariposas are forms of Calochortus, yet there are several strains, all with the slender grace of stem belonging to the species. Cup-shaped flowers, one to many on a stem, wonderfully marked with eyes and dots and pencillings in rich colors, are characteristics. Yet each strain carries out the plan on a color scheme of its own, and then can be compared only with the Orchids in wonderful variability of beauty. "Mariposa" is simply the Spanish word for butterfly, and is applied to these Tulips because the eyes and markings are so much like those on a butterfly's wings. The bulbs are small and should be planted about 2½ inches deep and covered during winter.

***Clavatus** Doz. \$1.30, 100 \$10.00

The largest flowered and the stoutest stemmed of all Mariposa Tulips. The blooms, which are shaped like a bowl, are often over 4 inches across, of a deep yellow, and the lower half covered by stiff yellow hairs.

***Venustus, El Darada** Doz. \$0.75, 100 \$5.50

They grow from 1 to 2 feet high and branch. The flowers are simply marvelous in their variety of colors and markings. Scarcely two are alike; in a mixed lot they may vary through white, lilac to purple and again through shades of pink to claret-red. In any mixture whites, more or less eyed, predominate. There is no better investment for the flower lover than a quantity of these bulbs. They thrive best in a rather porous soil, either sandy or gritty, and will grow either in sun or light shade. Flowers are 2 to 4 inches in diameter. Mixed colors.

***Venustus aculatus** Doz. \$0.75, 100 \$5.50

Wonderfully varied in whites and creams. More or less tinted purple, and with very rich eyes. We have had the flowers 4 inches across. The plant is a good grower, and the flowers are most satisfactory.

***Finest Mixed Colors** Doz. \$0.65, 100 \$4.50, 1000 \$40.00

This is a lovely mixture containing many varieties; planted in a sheltered spot in the rockery they will make a charming lot of color.

Camassia

(Hardy)

There are few bulbous plants that meet climatic or soil conditions better or give a more attractive bloom. They are hardy without protection, and thrive either under ordinary garden conditions or when naturalized in open, moist woods or in not too dense a grassy growth. The flower stems are 3 to 4 feet high with as many as a hundred star-shaped flowers measuring 1½ inches across and flowering in long succession.

***Esculenta** Doz. \$0.55, 100 \$3.75, 1000 \$32.50

Very showy in mass planting. Forms flower spikes 2 feet high, bearing a cluster of star-shaped flowers of a very fine, rich purple. Plant 4 inches deep. Extra heavy bulbs.

***Leichtlini** Doz. \$0.85, 100 \$6.50

Same as preceding but stronger grower, flowers are larger and come in various hues of blue and creamy white. Extra heavy bulbs.

Calla - Zantedeschia

Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. Plant but one in a pot. We call especial attention to the Yellow Calla, which is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. Plant Callas indoors in the late fall of the year. In April or May dormant bulbs may be planted near the pool in a sunny spot where they will flower beautifully in August or September.

***Alba Maculata** Doz. \$2.05, 100 \$13.50

The abundant spear-shaped leaves are spotted silvery white all over, reaching a height of 18 inches, and are produced abundantly. The white flowers are small and trumpet-shaped with crimson blotch at the base. Excellent near pool or in a bog garden. Plant outdoors in spring.

***Elliottiana (Yellow Calla)** Doz. \$2.20, 100 \$15.00

One that should be planted extensively. The deep golden yellow flowers are truly magnificent and produced in abundance. The green foliage is spotted white, which adds to its beauty; lovely house plant as well as garden subject.

***Gadfrey (White Calla)** Doz. \$2.30, 100 \$16.00

Chionodoxa Gigantea

Chionodoxa Tmali

Chionodoxa - Glory-of-the-Snow

A mass planting forms one of the most sumptuous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of a sky-blue with a pure white heart, creating a lovely effect. They should be planted in the fall, 3 inches deep, about 18 bulbs to a square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. All are 6 to 7 inches high, therefore excellent in the rockery as well.

Colchicum Autumnale Major

Colchicum Speciosum

Colchicum - Meadow Saffron

(Giant Autumn-Flowering Crocus)

Colchicum are autumn-flowering bulbs with large Crocus-like blossoms which appear during the months of September and October, without foliage. The foliage, however, appears early in the spring about the same time the Tulips and Hyacinths are in bloom and disappears in June. They are especially recommended for planting between the taller growing rock plants such as Cerastium, Vinca, Pachysandra, and the various Sedums, where their bold, checkered Crocus-like blossoms are seen to the best advantage. Blooming in September and October when flowers in the rockery are scarce, they are especially valuable. They may also be planted in the open woods or in naturalistic plantings of any sort. The bulbs, if kept indoors, will bloom during September and October in the window without any earth or water and after blooming, the bulbs may be planted in early November outdoors, and will not suffer in the least.

Spring-Flowering Dutch Crocus

The finding of these Crocus in bloom is one of the genuine delights of life. Though we may eventually plant them by the thousands or may have been so long at gardening that little surprises us, yet that first Crocus is a great event. And we suggest that in every garden, no matter how large or how small, there be some definite Crocus corner which we can watch during those early days of March. **Prices quoted are for top size bulbs.** The larger the bulb, the greater the number of blooms.

Spring-Flowering Crocus Species

Besides the Dutch Crocuses there are certain species that bloom very much earlier in the year, often before the snow has gone.

Crocus Imperati, pale lilac with buff jockets, often flowers in late February, and is closely followed by *Crocus Sieberi*, a fuller, purer mauve sort; it has as a companion the deep rich yellow *Crocus Susianus*, which is even more attractive in the bud stage with its dark, rich brown flowers on the exterior of the segments. Once planted, they will take care of themselves for many years. Then comes *Crocus Tommasinianus*, an exquisite vase-like form, in color varying from a pale mauve to quite a rich purple.

Charming in the rock garden planted between *Sedum* or other creeping plants.

Eremurus

A noble family of hardy plants, most delightful and desirable for stately and colorful groups in large plant borders and shrubberies. They are perfectly hardy, and when well established, produce dozens of giant flower spikes, like huge Hyacinths, attaining a height of from 6 to 10 feet, the flower spike (comprising several hundred flowers) being from 2 to 3 feet long. They thrive in any sunny, well-drained border. They should be planted in early fall only. These wonderful, gigantic flowering plants do not require a great depth of soil, as the fleshy roots spread outwards. The plant disappears above ground after flowering and annuals may be planted close to them to fill the vacant space. A light mulching is advised as a winter protection.

The following list includes some of the finest and rarest in commerce, all flowering in July. No. 1 and No. 2 size roots not guaranteed to bloom first year.

For several years we have been increasing our stock so we could offer roots at a popular price. We suggest that they be planted in groups of not less than 3, better effects are created if planted in masses of six or a dozen. We have made our price low to enable you to do this. Eremurus 3-Year-Old Seedlings.

During the past few years there have been many requests for Eremurus seed and young plants. The seed of Eremurus is difficult to germinate; we, therefore, never offered it because it was bound to lead to disappointment. Seedling roots, one or two years old, are too small for the average person to care for, but we are now able to offer some fine roots which are three years old. We know these will grow without trouble and surely are the same varieties as offered above. It will be well worth your while to plant a few of these healthy young roots for growing on.

- ***Eremurus Seedlings** Doz. \$4.25, 100 \$30.00

Eremurus

Freessias

Galanthus Byzantinus

Fritillaria Recurva

Fritillaria Meleagris, Aphrodite

Freesias

Without doubt the most sweetly scented flower grown; a single bloom permeates the living-room with its delicate perfume. Although they are quite popular and very easily raised, we suggest the following treatment: Procure the bulbs as early as possible and plant them in August, 6 to 25 bulbs for a single pan. The soil should be a mixture of good loam. The bulbs planted early, say August and September, must be placed outdoors until cold weather sets in; must be regularly watered and kept growing all the time. In November, before frosts appear, the pots should be placed in the window of a cool room.

Fritillaria Imperialis

The Crown Imperials with their stately gracefully drooping flowers should not be missed in any garden. They want a good soil, much sun, and can be left undisturbed for years. Galanthus - Snowdrops

Snowdrops belong to the most beloved early flowering spring bulbs. They require very little attention, and can remain undisturbed for years and years. They like rather moist and cool soil. To get a lovely effect they must be planted thickly, while they can be grown under trees and shrubs, in woodlands and in lawns. In the latter case, the lawn should not be mown before the leaves are withered, or next year's blooms may be spoiled.

- ***Nivalis** Doz. \$0.45, 100 \$3.00, 1000 \$25.00
This is the old-fashioned favorite. Its lovely white nodding blooms are out before the frost is out of the ground; one of the lovely bulbs that tell us spring is almost here. A group naturalized in the shade of shrubs or under trees is worth while. Once planted they remain for a lifetime.
- ***Nivalis flore pleno** Doz. \$0.50, 100 \$3.50, 1000 \$30.00
Double form of the common Snowdrop, requiring same care.
- ***Elwesi** Doz. \$0.45, 100 \$3.00, 1000 \$25.00
This is a larger type than the old-fashioned Galanthus Nivalis and comes from Southern Europe. It is a very fine kind for the warm parts of the United States where the common Snowdrop does not do so well.
- ***Byzantinus** Doz. \$0.85, 100 \$6.50
The Byzantine Giant Snowdrop; broad shiny leaves like Galanthus Plicatus and large snow-white globular flowers. Very early flowers; in mild winters we often have flowers here in January. It requires a somewhat sheltered position. May be gently forced in pots.

Gladiolus Nanus

New Tecolote Hybrids

They can be forced by the end of March, and come in very useful when most of the other bulbs have gone. In moderate climates these bulbs are planted outdoors. They multiply rapidly and are splendid cut flowers. They should be planted in the fall and protected with straw to prevent damage from frost. Slender stems and dainty orchid-like flowers.

"Tecolote" Hybrid Mixture Doz. \$0.70, 100 \$5.00
Beautiful new strain, early flowering, with dainty flowers carrying the characteristic diamond-shaped markings on the lower petals. Long, strong stems. New pastel shades of lavender-blue, orchid, salmon, pink, rose, scarlet, orange and many others.

Gladiolus, Tristis Hybrids Doz. \$1.30, 100 \$9.50
A decided improvement on Gladiolus tristis concolor. Flowers resemble them but slightly larger and many nearly white. Has the same pleasant spicy fragrance at night or when placed in a darkened room. Stems 15 inches to 3 feet tall. Blooms earlier than Gladiolus tristis concolor. Very desirable for cutting and forcing.

Haemanthus Coccineus

Haemanthus coccineus Each \$1.00
"Blood flower." One of a large group of tropical and sub-tropical bulbs of the Amaryllis family all of which are interesting and curious and some very showy. This variety has two bright green opposite leaves 3 to 5 inches wide and 1 to 2 feet long lying flat on the ground, growing in the winter. The single bright red flower appears in the fall before the leaves. It is a large cluster or umbel 2 to 4 inches across composed of many small flowers closely placed. Stem 6 to 9 inches high, green heavily spotted with red. General appearance striking and curious.

***Reticulata (Fragrant Iris)** Doz. \$1.30, 100 \$9.50
This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Spanish or Dutch Iris. Its main value lies in the fact that it may be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4- or 5-inch pot when received will bloom about Christmas time. The fragrant blossoms remind one of a bunch of fresh violets. Perfectly hardy with reasonable protection. It is one of the loveliest early flowering bulbs for the rockery. To show it off well, plant a number of bulbs under the white Arabis Alpina; you'll enjoy the results more than we can tell you.

Gladiolus Tristis

Dutch Iris

Improved Spanish Iris—For Garden Planting

This very distinctive group is of recent origin and has in a few years won international recognition. The flowers are not only superior in substance, brilliancy and purity of color but also earlier, larger and of greater refinement than the old Spanish Iris. The new hybrids we offer are readily distinguished by the narrow orange stripe on the falls, while the older varieties have a larger yellow blotch. These Iris are unsurpassed as cut flowers, since they will stand any amount of handling, lasting fully a week in water. Their hardiness and interesting color range have made them very popular for garden planting. In extreme climates they need some protection. The varieties we list have been carefully selected to give the full range of colors.

Ixia, Bloem Erf

English Iris

These magnificent bulbous Irises thrive in any ordinary garden soil but prefer a good loam. The earlier the planting, after beginning of September, the greater the success; the bulbs should be planted 4 inches deep. The varieties contained in our mixture, we have especially selected as being the very finest and most distinct in cultivation, and they will be found as strikingly beautiful in color as many of the sumptuous orchids. They flower from end of June to beginning of July, thus succeeding the Bearded Flag Irises, Early Xiphium and Spanish Irises. As cut flowers they take a first place.

*Mixed	Doz. \$0.35, 100 \$2.25, 1000 \$35.00
These beautiful bulbs from the Cape Colony (South Africa) are far too little known; they should be planted in late autumn and in cold districts they must be covered with a thick layer of straw or leaves. They are splendid for southern states. There are few bulbs so lovely and graceful and those fortunate enough to live where the climate is mild should plant them by the hundreds.	

Lachenalia

The Cape bulb has been terribly neglected in this country. They are long known in Europe under the name of Cape Cowslip. These bulbs are especially useful for forcing as they can be grown in flats or in pots or baskets. All of them do well out-of-doors in milder climates and are showy in beds, borders, and rock gardens and all are easily grown under glass. They have from one to two dozen generally, pendulous, fire-cracker-like flowers, three-quarters to one inch in length on stems six to nine inches and bloom from late November to February, depending on the time of planting and the temperature in which they are grown. The flowers are loosely borne on a tapering spike eight to twelve inches high, but do not droop. Stamens and style in some varieties extend beyond the mouth of the flower.

Cultural Directions: The bulbs may be planted five or six in a 5-inch pot in a compost of two parts sandy loam and one part leaf mold. Water sparingly. Place in cold frame until weather becomes too cold, then move to a greenhouse or bring in house. Water may be used frequently in growing stage. May be had in bloom at Christmas. Bulbs multiply freely and may be used from year to year.

Pendula superba	Doz. \$2.00, 100 \$13.00

Lycoris

Radiata	Doz. \$1.60, 100 \$11.25
Native of Japan and China. Blooms in Fall before leaves appear. Bright red funnel-shaped flowers with wavy segments, somewhat like nerines, on stems 12 to 18 inches tall. Free blooming and easily grown. May be left undisturbed for several years in milder climates when it will make fine showy clumps.	
*Squamigera (Amaryllis Halli)	Each \$0.65, Doz. \$6.50
Produces in early spring attractive green foliage which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalks spring from the ground to a height of 2 to 3 feet, developing an umbel of large, lily-shaped flowers, 8 to 12 in number, of a delicate lilac-pink shade. The bulb is perfectly hardy; must be planted in fall. Cover crown about 4 inches.	

Leucojum - Snowflake

*Aestivum (Summer Snowflake)	Doz. \$0.85, 100 \$6.50
A very handsome, hardy, robust growing plant, producing spikes of elegant drooping white flowers in May. Greatly prized for cutting, on stems about 14 to 18 inches high. Same culture as for Narcissi.	
*Vernum (Spring Snowflake)	Doz. \$0.75, 100 \$5.50
This is one of the earliest and most attractive spring flowers. Growing from 6 to 8 inches high they bear dainty nodding flowers which are white, tipped with green. Plant in early fall in a good, light, well-drained soil 4 or 5 inches apart in masses of bold clumps, 2 inches deep. If left alone will bloom year after year.

Flowers exquisite light blue on tall, wiry stems and of very long-lasting quality, with faint heliotrope fragrance; for greenhouse culture or out-doors in warm states. March and April flowering. Unquestionably one of the loveliest new bulbs introduced. We predict it to be as much used as Freesias as soon as the price permits its free planting.	

Lily - of - the - Valley

*Lily-of-the-Valley for Forcing, Berlin Forcing Pips	100 \$6.00, 1000 \$50.00

Some are useful for cutting, others for the perennial garden and others still for pot culture and rock gardens. All listed below flower in spring. They show a wide range of colors and vary in height from 6 inches to 3 feet. On most of them the foliage is not important. Same culture as for Freesias.

Often called Peacock Iris. Flowers white or light blue with peacock eye at base of outer segments. Stems 10 to 15 inches high. Excellent for cutting, forcing, rock gardens and pots.

New introduction. Slender plant 18 to 24 inches high with many wiry branches. Well covered with flowers looking at a distance like a close group of butterflies. The outer segments of the flowers are light mauve, penciled with Parma violet, with a bright yellow spot at the base, inner segments light mauve with little penciling. Starts flowering 6 weeks after planting and keeps on 3 to 4 months. Blooms can be had throughout the year in the milder climates by making successive plantings about every 2 months. Very useful in the colder climates as a window pot plant in the winter and out-of-doors in the spring and summer as soon as danger of heavy frosts is over. Planted in clumps it provides a mass of color over a long period and should be very useful in the border. Corms can be held in cold storage at 40 degrees to make successive plantings over a long period.	
Isopetala	Doz. \$1.25, 100 \$9.00
New introduction. Slender well-branched plant 6 to 8 inches high. Flowers similar to Moraea polystachya but lavender in color. Most useful in pots and rock gardens.	

Mertensia Virginica

(Virginia Blue Bells)

This is indispensable in the garden for color effect; flowers are porcelain-blue; buds pink at opening. The plant grows from 1 to 2 feet high, bearing a panicle of flowers about 1 inch long in short pendent clusters. It is splendid for the open border or for naturalizing along the woodland path. We know of no other spring flower which does so well in deepest shade. It flowers from the time Daffodils are in bloom, continuing while the May-flowering Tulips are at their best. Use this delightful plant in quantities, as it is permanent and so helpful to create beautiful pictures, especially in shady places.

They are best planted immediately on receipt and can remain undisturbed for years. They are absolutely hardy and some varieties are delicately fragrant. Botryoides, Azureum and Armeniacum are beautiful when forced in the house, same culture as Freesias; while Plumosum is always a source of great interest. All are about five inches high.

Rodopel

Protects Bulb Plantings

against ravages of rats, mice, moles and other destructive rodents. Rodopel is a new material so highly distasteful to rodents that they refuse to go near it in their search of food. Three years of study in laboratories and in the plantings of nationally known bulb growers have shown that damage by rodents is wholly eliminated when Rodopel is used.

How to Use Rodopel

It does not kill rodents but drives them away from the plantings. It is harmless to pets and birds.

Rodopel is simple to use. It is only necessary to scatter a small amount (about one heaping tablespoonful—more is harmless) around each bulb at planting time.

For small plantings done with a trowel drop a pinch of Rodopel in the bottom of the hole; set the bulb; partially cover the bulb with soil; then scatter more Rodopel around the bulb to ring it; and cover as usual.

For large plantings where the bed is dug out, scatter Rodopel lightly over the bottom of the bed; set the bulbs in place; spread a small amount of soil to partially cover the bulbs; scatter more Rodopel around the bulbs and cover as usual.

Rodopel is—

Harmless to bulbs.

Harmless to other vegetation.

Non-poisonous.

Clean and pleasant to use.

Odor pleasant to humans—distasteful to rodents.

Packed in two sizes—

2-gallon size, sufficient for 100 bulbs, \$2.00

5-gallon size, sufficient for 250 bulbs, \$3.75

Recommended for all bulbs liable to be eaten by rodents.

For your convenience in applying Rodopel it is impregnated on high grade peat moss which aids in preparing the bulb bed.

A New Barberry

Berberis Mentorensis Makes a Better Hedge

Berberis Mentorensis (Plant Patent No. 99) is the result of a cross between *Barberry Thunbergi* and *Barberry Julianae*. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew.

In Northern Ohio the leaves remain green until after the holidays, are dropped during the late winter, and new foliage appears early in April. Plants growing south of here retain their foliage much longer. In southern parts of the country *Berberis Mentorensis* is evergreen.

Its most valuable attribute is its ability to withstand heat and drought. Few other shrubs or hedge plants are able to go without water and withstand intense heat as *Barberry Mentorensis* and look as well. During the hottest weather there is never any sign of wilting or burning, much to the amazement of everyone.

Upright growth; easy upkeep (requires really no pruning), and its tenacious foliage, more than compensate for the lack of berries. We heartily recommend *Berberis Mentorensis* to you and claim it to be the best moderately priced and perfectly hardy hedge plant to date.

Mentorensis does not rust or discolor in hot, dry weather

First—it is evergreen practically the year around. Think what that means.

Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—needs no pruning. It is of erect growth which becomes dense when the plant is three or four years old. No upkeep! No pruning!

Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

Sixth—is not “choosy” about where it grows. No matter if you can’t make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

AUTUMN-FLOWERING IRIS PUMILA

Flowering Two or More Times Each Season

These autumn-flowering Irises have two or more normal flowering seasons each year. They blossom in the spring along with other early flowering varieties and again in the autumn, beginning in September and continuing until killed by heavy frosts. Some of them also flower intermittently throughout the year.

Autumn Queen

Each \$0.18, Doz. \$1.80

This is a reliable spring and fall bloomer. A pure snow-white. It belongs almost in the same class as Jean Siret and Lieut. Chavagnac so far as size and height is concerned, but is a little larger and a little taller.

It also is the largest and tallest of all the fall bloomers, being about 30 inches high. The flower is almost black.

A favorite climber for a sheltered position. Has beautiful fragrant yellow flowers in early spring. Hardy south of Philadelphia, needing protection farther north. Plant in spring only. Does well in ordinary good garden soil.

LONICERA - Honeysuckle

Their climbing qualities are all that can be desired, but the fragrance of their flowers makes their strongest bid for favor. They are perhaps to the old-fashioned garden as a vine what the Hollyhocks are as a plant. They simply should be there somewhere.

Goldflame Each \$0.50, Doz. \$4.75
Immense, showy clusters of trumpet-shaped buds and fragrant blooms. The outside of the petals is brilliant flame-pink, the inside a creamy golden yellow. Dark glossy foliage adds to its charm. Halliana Each \$0.30, Doz. \$2.75

The long tubular blooms, which are produced in large-sized clusters, are golden in color and exceedingly fragrant. A fine climber for shady or sunny porches or trellises. Its clean, rich foliage and fine habit easily make it the most desirable Honeysuckle.

POLYGONUM - Silver Lace Vine

Auberti Each \$0.40, Doz. \$4.00, 100 \$25.00

SCHIZOPHRAGMA HYDRANGEOIDES

(Climbing Hydrangea). Fine plants in pots, Each \$0.75, Doz. \$7.50
One of the finest and most artistic vines in existence and extremely rare. Foliage large and bold, it clings to walls or other support. Flowers in large, flat clusters, studded with large, flaky, sterile blooms which are very showy and fragrant.

WISTERIA

There is a much wider range of varieties than is generally thought. Descriptions below are condensed because the species to which each variety belongs covers the major points. The two important species are: Wisteria Sinensis, the Chinese Wisteria, characterized by large fragrant flowers in compact clusters of medium length. They come into bloom very young and all the flowers in each cluster open at about the same time before any leaves appear. Wisteria Floribunda, which is better known as Wisteria Multijuga or Japanese Wisteria, has long slender racemes of smaller flowers. Those at top are fully open while the lower ones are only small unopened buds. This of course lengthens the blooming period until the leaves are pretty well out. All our stock is grafted and grown in a special manner to induce early bloom rather than a lot of useless wood. Seedlings or plants improperly propagated may go eight or ten years without ever producing a flower. We maintain that if wood is the main thing wanted, it is more economical to patronize a lumber yard than a nursery.

All our Wisterias have flowered in the nursery before they are sold.

Floribunda, "Issai" Each \$2.25
A very fine thing, entirely distinct and having many excellent qualities. Flowers have much deeper color than common Japanese and are borne very profusely. It is also decidedly precocious, coming into bloom very young. The short silky seed pods hang on all winter if not cut off, and are quite ornamental.

Floribunda, "Kyushaku" Each \$2.00
The Japanese name means "nine feet." Of course that is an exaggeration but flower clusters are supposed to attain three to four feet on old vines.

Floribunda alba Each \$2.00
White Japanese Wisteria. Last of all to flower and very profuse bloomer. Snow white.

Floribunda longissima Each \$2.00
Extra long clustered Wisteria. Lavender-blue. We have actually measured clusters well over four feet long and there is dependable record of old vines producing occasional clusters fully 6 feet long! If the longest possible clusters are wanted, fertilize heavily in autumn after the leaves have fallen, but not in spring or during the growing season.

Floribunda rosea Each \$2.00
Pink Wisteria. This is the finest Pink Wisteria we have ever seen. Clusters about 15 to 18 inches long. Slow to commence flowering but once started it blooms profusely. All plants have already bloomed in the nursery.

Floribunda violacea plena Each \$2.00
Double Violet Wisteria. The only double Wisteria known in this country and has the darkest colored flowers of all. They are exactly like dark colored purple Violets borne in clusters about 15 to 18 inches long. Very free bloomer.

Sinensis (Chinese Wisteria) Each \$1.25
This is the old favorite called Chinese Purple, but really lavender shaded blue.

Sinensis alba (White Chinese Wisteria) Each \$1.25
Has white fragrant flowers.

Geisha Each \$2.75
A very dainty variety. The cluster as well as the individual flowers are smaller than usual. The effect is delightful and charming. Color a clear light lavender; very free flowering.

Longissima alba Each \$2.75
A perfect beautiful pure white form of the above variety.

Mrs. McCulloch Each \$2.75
A rare and beautiful variety. The flowers are large, of a rich purple color and grow in compact clusters. The growth of the wood is short and jointed, making this a good kind where space is limited.

Royal Purple Each \$2.75
Brilliant colored, good sized clusters of royal purple; flowers are freely produced, making this one of the fine and outstanding varieties.

Tree
Wisteria

Tree Wisteria

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers are produced by the hundreds and completely cover the tree during May, transforming it into a thing of sheer beauty. In formal gardens Tree Wisterias are indispensable. On the lawn they develop into beautiful specimens and live for generations, increasing in beauty and dignity each successive season. The plants we offer are grown on stems about 4 feet high and the crowns are about 2½ to 3 feet in diameter. Every plant has bloomed before it leaves our nursery.

French Tree Lilacs

Growing Lilacs in tree form is very popular in Europe. It brings their fragrant flowers close to the eye as well as the nose. It permits the planting of bulbs, annuals, or other flowers underneath the tree. In that manner, prevents loss of garden space. Further, they are perfectly adapted to the formal garden or formal beds. Spaced at intervals along a garden path they are a feature out of bloom as well as when in flower. They are about 4 feet in height.

Etna Each \$3.50
Broad panicles of medium sized regular flowers, deep claret-purple, late. Practically the most approaching to red. Double.

Marechal Foch Each \$3.50
A sensational new lilac. The expert horticulturist, Felix Crousse, pronounced this to be the handsomest of all single lilacs. The high panicles, carried by long, straight stems, are truly immense and very light. The individual flowers, fully one inch in diameter, perfectly shaped, are of a bright carmine with a pink eye when opening, contrasting with the mauve of the older flowers and the deep carmine of the buds. Early.

Marie Finon Each \$3.50
New! Extremely floriferous, immense single flower of purest alabaster white. Large branched panicles.

Paul Deschanel Each \$3.50
Immense panicles of very broad flowers, rosy mauve with carmine buds, exceedingly free.

Hardy Azaleas and Flowering Shrubs

AZALEA - Hardy Varieties

These plants, combining as they do the advantages of both evergreens and flowering shrubs, have deservedly won their way to the forefront of popularity. Once established, they remain for years, often for generations, becoming more beautiful, increasing in value, and assuming more distinct character with each passing season. For worth-while permanent foundation plantings, for generous use in the natural landscape, and properly placed as individual specimens, they are unsurpassed.

Culture. Plant in full sun, in the south in light shade, in soil freely mixed with leaf mold and peat in about equal proportions. A yearly top dressing of well rotted stable manure or one pound of Wayside Gardens Plant Food scattered around each plant in the fall will help to produce abundant blooms. Remove faded flowers at once, do not let plants go to seed; never cultivate. Water freely in dry weather.

Japonica Plants in pots, 12-15 inches, Each \$0.60; Doz. \$6.00
Of easy culture, in fact a very vigorous grower, flame-orange and red flowers in great clusters in May.

***Kaempferi** Plants in pots, 12-15 inches, Each \$0.60, Doz. \$6.00
(Torch Azalea.) One of the most popular, hardiest and most satisfactory of all; a vigorous grower, never failing to produce its orange-red flowers in May; excellent as a point of emphasis in the mixed shrubbery border.

***Mollis**
Field-grown plants with buds, 15-18 in., Each \$0.80, Doz. \$8.00
Field-grown plants with buds, 18-24 in., Each \$1.00, Doz. \$10.00

Pontica Field grown plants, 15-18 inches, Each \$0.80, Doz. \$8.00

Plants in pots, 10-12 inches, Each \$0.60, Doz. \$6.00
(Royal Azalea.) A vigorous plant 3 to 5 feet high, with very large showy flowers of pale rose-pink, the upper petals lightly spotted with brown.

NEW PINK BUDDLEIA, CHARMING

A new shrub bearing throughout the late summer and autumn elegant long sprays covered with lovely lavender-pink blooms which, compared with other Buddleias introduced up to date, are distinctly pink. It received a Silver Medal from the Pennsylvania Horticultural Society. For September and October flowers we suggest pinching off the first flower-spikes which develop in July to aid in the development of side branches which will bring a greater abundance of flowers during the autumn months. Like other Buddleias, this new variety attracts a great many colorful butterflies—a feature which accounts for the popular name of this showy, hardy shrub. Charming gives a wonderful effect in the garden and has exceptional value for house decoration.

Strong flowering plants, Each \$0.50, Doz. \$4.00, 100 \$30.00

BUDDLEIA

Ile de France Three \$1.10, Doz. \$3.30, 100 \$20.00

CULTIVATED LARGE FRUITED BLUEBERRIES

The supreme achievement of skilled horticulturists who have worked for years to improve our most luscious native fruit

The question invariably asked by those whose interest has been aroused is "Are these new blueberries hard to grow?" The answer instantly and truthfully given is "No; they are not in the least hard to grow." In bloom they are attractive, and in fall the green foliage turns into beautiful shades of red and crimson.

Blueberries are acid-soil plants. This acid condition is easily brought about by simple preparation of the soil—with woods soil, oak leaves, peat or aluminum sulphate.

The new, named varieties of cultivated blueberries are not self-fertile. Consequently, a bush grown by itself will not bear fruit, but where six or more plants of different varieties are grown in close proximity, perfect fertilization of the blossoms takes place, and abundant crops of huge, luscious berries result.

Consequently our blueberries are sold in units of six plants (mixed varieties) or in blocks of 24 plants or more (mixed varieties). Each plant bears a carefully written name tag. **Orders for single plants will positively not be accepted for reasons noted above.**

2-year size, \$6.25 per unit of 6 plants, 24 plants or over, \$0.90 per plant. All plants are sent with ball of earth. Cultural hints with each order.

HYPERICUM

***Calycinum** Three \$0.95, Doz. \$3.00, 100 \$18.00
Similar to Moserianum, except that it makes underground runners, which, when they come up, produce a beautiful carpet of green covered with large, yellow blossoms. Ground cover; hardiest of all; 20 inches.

Henryi

The same as Moserianum, though slightly more upright. A lovely little shrub.

*Moserianum

Three \$0.95, Doz. \$3.00, 100 \$18.00

A most desirable border shrub about 20 inches high, of free and graceful habit, producing long, slender stems, drooping, apparently from the weight of the flowers and buds, although the flowers face so none of their beauty is lost. Color a rich golden yellow, and bloom continuously the entire season.

LABURNUM VOSSI - Golden Chain

Each \$3.50, Doz. \$35.00

Long-clustered Golden Chain. Small tree-like shrub with green bark and foliage like exaggerated clover leaves. Flowers are pure golden yellow and formed exactly like those of wisteria. LONICERA - Honeysuckle

Syringantha Wolfi

The twiggy drooping branches of this most delightful and practically unknown small shrub are covered with rosy lilac showy fragrant blooms in clusters not unlike in fragrance and form the Daphne Cneorum. It is of very easy culture. Does well in light shade or full sun, growing not much higher than 2 to 2½ feet. Excellent for in front of large shrubs or in the flower border and rock garden. You will much enjoy the fragrance of this rare little bush.

MAGNOLIA

Soulangeana

Each \$3.25, Doz. \$32.50

We offer flowering plants with a lot of buds, about 3 to 5 feet tall.

PYRACANTHA (Crataegus) - Firethorn

Coccinea Lalandi

Each \$0.60, Doz. \$6.00

A most remarkable fruiting evergreen shrub, growing more than 6 feet high. Bears attractive large trusses of white flowers during the late spring followed by an abundance of brilliant orange-scarlet berries which remain late into the winter. It is difficult to transplant old or large plants. We therefore send only young stock which establishes quickly. It prefers a sandy soil and warm location. Strong young plants.

VITEX - Chaste Tree

Macrophylla

Each \$0.50, Doz. \$5.00

A graceful shrub with attractive spikes of lovely lavender-blue flowers. Blooms profusely from July until fall and grows more than 10 feet high unless pruned back. It is a most desirable summer-flowering shrub of distinctive appearance. Fits in well in the border and is also suitable as a lawn plant. Its form and foliage as well as the lilac flowers are very unusual. Strong plants, size 15-18 inches.

VIBURNUM - Gardenia Scented Snowball

Burkwoodi

Each \$2.00, Doz. \$20.00

Improved Carlesi. Waxy pink and deliciously fragrant, the flowers of this new fragrant viburnum are produced in early spring when the leaves are unfolding. They form round, domed clusters, and the gardenia-like fragrance is so sweet as to pervade a large area. The plant grows about 4 feet high and 5 to 6 feet in diameter. It likes a well-drained, sunny place with plenty of moisture throughout the season. This is a jewel for the garden—a real aristocrat. For the small garden, where there is room only for the choicest shrubs, the one viburnum above all others that should be grown is viburnum Burkwoodi. Foliage brilliant in autumn. Much stronger and healthier grower than Carlesi.

Boxwood

We are glad to be able to offer this valuable shrub at a price everyone can afford. The stock we offer is bushy and wide, excellent for edging walks or beds. Contrary to the usual idea, Boxwood is hardy and will stand a temperature of 10 below zero without any damage, providing the plants are protected with a little lath screen, admitting air and light, but giving enough shade so that the sharp sun during the months of December, January and February, does not burn the foliage.

There are two popular forms, the low dwarf variety for edgings to beds and a taller one suitable for hedge making.

Wayside Gardens Lawn Seed Mixtures

We offer below Wayside Gardens Mixtures of grass seed, each carefully prepared to best serve its specific purpose. Blended from choice imported lawn seeds.

Wayside Gardens Open Place Lawn Mixture

A general purpose lawn mixture of exceptionally high quality, rating among the three finest grass seed mixtures offered in America. Permanent grasses predominate over temporary grasses in the ratio of four to one, which is considered by experts to be ideal. This mixture will produce a beautiful weedless lawn.

1 lb. \$0.60, 5 lbs. \$2.75, 10 lbs. \$5.25,
25 lbs. \$11.25, 100 lbs. \$40.00

Wayside Gardens Shady Place Lawn Mixture

Shaded lawns are a problem. Mixtures for such locations should consist of varieties which will grow vigorously with little sunlight and in soils deficient in plant food and moisture. The Wayside Gardens Shade Mixture is just such a combination of domestic and imported grasses. No better mixture can be bought at any price.

1 lb. \$0.75, 5 lbs. \$3.50, 10 lbs. \$6.75,
25 lbs. \$15.00, 100 lbs. \$55.00

Wayside Gardens "Bent Formula"

A combination of the finest grasses, using as a basis for this mixture imported and domestic Bent grasses which are largely used in the best putting greens of today.

1 lb. \$0.95, 5 lbs. \$4.50, 10 lbs. \$8.50,
25 lbs. \$20.00, 100 lbs. \$70.00

A lawn made with our Bent Formula mixture and properly cared for will make a green on which all kinds of games may be played.

Wayside Gardens Athletic Field Mixture

This mixture contains varieties that will produce a sturdy, wear-resisting turf. The same formula has been used with outstanding success on many of the best athletic fields in the country. It contains no noxious weeds and is practically free of chaff and inert matter content.

25 lbs. \$10.00, 100 lbs. \$38.00

ROOTONE

What It Is and What It Does

ROOTONE offers the most economical, simple, efficient way for the use of plant hormones, giving twice the number of cuttings at the same cost.

ROOTONE contains the most powerful plant hormone of all, naphthalene acetic acid—diluted with other ingredients to get the best range of activity on plants.

ROOTONE IS BEST FOR CUTTINGS

Because —

LOW COST—1/30 to 1/50 of a cent per cutting.

SIMPLICITY—No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip and plant.

SPEED OF ROOTING—The time for rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING—Cuttings that root with difficulty such as holly, magnolia, arbor-vitae, lilac, and dogwood will respond in greatly increased percentages and in much shorter time. Tree cuttings, such as hickory, maple,

and hemlock, which do not root under ordinary conditions, respond splendidly to ROOTONE treatment.

QUALITY—The naphthalene acetic acid in ROOTONE is made by a special process that results in the highest purity and uniformity. This hormone keeps its full activity better and longer than any other growth substance. Compared with the indol hormones, it penetrates stem tissues three to four times better, resulting in better root distribution.

ROOTING OF CUTTINGS WITH ROOTONE

Directions: Simply dip the cuttings at the base, singly or in bunches into the ROOTONE powder up to an inch. Shake off the excess and place in the propagation bed of wet sand or peat moss and sand. Then follow usual propagation methods. Slow acting cuttings may be helped by dusting a second time or even a third time, at two- to three-week intervals, as the judgment of the user dictates.

Prices: One-Dollar jar contains two fluid ounces when packed. In case the powder has settled it will fluff to original volume with a light shaking. It will treat up to 3000 cuttings.

INSECT-O-GUN

This inexpensive attachment—the Insect-O-Gun—which is highly endorsed by leading insecticide manufacturers, entirely eliminates hand pumping and heavy, unwieldy apparatus. Attached to your garden hose, the Insect-O-Gun ejects a penetrating wide-angle “fan” spray with tremendous velocity, reaching every insect in its path with telling results.

The Insect-O-Gun is equipped with a standard pint Mason jar and can be used with any insecticide requiring water solution. No adjustments are necessary to secure the correct spraying proportion, and there are no moving parts except the handy trigger. When full, the one-pint Mason jar holds sufficient insecticide to completely treat the average garden.

The Insect-O-Gun is strongly built of heavy, durable, non-rusting die metal, and will last a lifetime. Any standard pint Mason jar can be used with the unit. It is boxed complete, with full instructions, ready to attach to your garden hose for instant use.

Several of these “Guns” have been in use by Wayside Gardens for three years. We found them entirely satisfactory as well as great labor savers. We advise you to use them in combination with several Mason jars containing the various sprays.

WAYSIDE GARDENS PLANT FOOD

So many visitors coming to see our hardy plants in bloom, and noticing their sturdy growth and abundant healthy foliage, were constantly asking us what special plant food we used, and where they could get it.

Wayside Gardens Special Plant Food is easy to use. The directions are simple. If your garden is an established one, apply twice a year, March first and September first. Use 15 to 25 pounds for top dressing a space of 500 square feet for hardy plants, rock plants, roses, annuals, and other flowering plants, shrubs and bulbs.

In making a new garden, double the amount and mix with the soil. Planting may be done at once. No burning is possible. For old

lawns, use 10 to 25 pounds for top dressing 500 square feet. In making new lawns, use double the amount and mix with the soil. Seeding and bulb planting may be done at once. No burning effect will result.

For potted plants, a 3-inch pot full of the food, mixed with a bushel of soil, will give you splendid results.

50 lbs., \$3.00; 100 lbs., \$5.00; 500 lbs., \$17.00; 2000 lbs., \$65.00.

Full directions in every bag.

Can only be obtained direct from Wayside Gardens.

The illustrated hedge is 5 years old, has never been clipped, is perfect in shape, and is about 3½ feet high.

Here's Drought Proof

Let us quote from a letter of Mortimer Burroughs, received in October. He is a landscape architect at Clayton, Missouri. This is what he says:

"I have been much impressed with the new Barberry Mentorensis during the terrible drought we had in St. Louis this summer.

"We moved several when in full leaf last spring. Planted them on the north side of the house in dense woods. They received no water during the whole miserable summer and scarcely any sunlight. In spite of this grilling handicap, they did not even droop, and actually made considerable new growth.

"As a shrub for foundation planting, either in shade or full sun, it is excellent. Its upright dense habit of growth makes it ideal for hedges, as it thrives equally well in shade as in full sun."

See page 30 for prices.

"MENTOR BARBERRY"
Erect in growth, rugged of stem,
with rich Taxus-green foliage
which remains until the end of
February.
